

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

---

62-207  
ST. LOUIS, MO., Dec. 31, 1892.

*Hon. D. R. Francis, Governor :*

**DEAR SIR**—In obedience to legal requirements, I respectfully present to you the Report of the Missouri State Board of Health for the year 1892.

Hoping that you will find the report satisfactory, I have the honor to be,

Respectfully yours, etc.

R. C. ATKINSON, Sec'y.

## REPORT OF THE BOARD.

---

*To His Excellency, the Governor of Missouri:*

Section 5433, Revised Statutes, 1889, requires that the report of the Board "shall include so much of the proceedings of the Board, and such information concerning vital and mortuary statistics, such knowledge respecting diseases, and such instruction on the subject of hygiene as may be thought useful by the Board for dissemination among the people, with such suggestions as to legislative action as they deem necessary."

It is also a duty, prescribed by section 5419, "to recommend to the General Assembly of the State such laws as they may deem necessary to improve and advance the sanitary condition of the State."

The following general report is respectfully submitted in compliance with the above requirements of the law :

### PUBLIC HEALTH.

So far as may be gathered from the evidences presented to the Board, the health of the State has not been up to the usual standard, doubtless owing to the extensive floods of our great river and the large area of territory overflowed, as well as to the long-continued rainless period which succeeded. The result has been the wide prevalence of an obstinate form of continued fever, which in some localities has prevailed as an epidemic.

### TYPHOID FEVER.

There has been an extensive prevalence of typhoid or enteric fever, though the percentage of deaths reported as resulting therefrom has not been up to the usual average. In no instance recorded have the examinations of the food or water supply, either chemically or microscopically, resulted in the discovery of the disease germs peculiar to this form of fever, and the cause of its extensive prevalence remains as yet unsettled, unless it be the low level of the ground water this fall, following the extensive saturation of the soil during the great

overflow. Prevalence of fevers, of obstinate and fatal character, is a part of the history of the years of great overflows in this latitude.

It is generally believed by those most familiar with the subject that this form of infectious disease is extended by improper food and water supply ; which conclusion suggests, beyond the peradventure of doubt, the urgent necessity existing at all times for keeping such supplies up to the highest standard of purity ; and especially is it necessary to protect the sources of such supply for large cities, where, as a rule, the whole population derives its water from a common source.

#### CHOLERA.

There having been fatal epidemics of Asiatic cholera in European ports having close commercial relations with this country, notably Hamburg, a port from which there has been a steady stream of immigration to North America, good reasons have existed for apprehension of its spread into this country, and the apprehension has been strengthened by the continued arrival of emigrant ships at the port of New York last summer and fall, bearing cases of Asiatic cholera amounting in number to more than 130. A vigorous quarantine was maintained, but in spite of it, some cases appeared in the city of New York. The disease still prevails in portions of Germany, France, Austria and Russia, and the fact that such a number of cases existed on our Atlantic coast for an extended period this year, warrants the presumption that the spring or summer of 1893 will be fraught with danger of an epidemic of this dread disease in our land.

This Board has held several meetings for the consideration of the subject, and addressed warning, advice and specific directions regarding sanitary precautions to the authorities of every county in the State. Should we be visited by the dread scourge, it will require the closest watch and the best efforts of the authorities to cope with it. Adequate means for such an emergency have never been provided by the Legislature, and the necessity for a contingent fund (asked for year after year by this Board) will be greater than ever. The part of prudence is to be ready before it comes.

#### VITAL STATISTICS.

The law requires that monthly reports of births and deaths shall be made to the Secretary, and contemplates that he shall publish a tabulated statement of the condition of the public health in each Annual Report, but the appropriation for the support of the Board—being, for all purposes save those of registration, only \$2500 per annum—is so small as to render the execution of that part of the law impossible.

The Legislature has made a requirement without providing the means of fulfilling it.

There are no means of accurately ascertaining the condition of the public health other than by regular reports from each county in the State, and it is important for the peace and well-being of the State that no dead body should be buried without a certificate giving the cause of death from the physicians in attendance or the coroner. No person should be allowed to practice either medicine or midwifery who fails to report births, deaths and cases of contagious or infectious diseases in every instance to some competent central authority in each community, whether township, county or city.

The advantages of such action are self evident, but the principal and most essential result would be the prevention or detection of crime and the discovery and control of diseases which might otherwise become epidemic.

Added to the beneficial results of such action in its immediate locality, a more widely reaching effect would be the securing of data on which to base sanitary statistics, which are not only important to the people in the State concerned, but vastly useful and necessary to mankind in affording opportunities for the comparative study of disease, its history, causes and the means of prevention.

If health be better than wealth, and life than property, the State should provide enough of its accumulated wealth to secure the means for the prevention of "preventable diseases."

#### A MEDICAL EXAMINING BOARD.

At the semi-annual meeting held in St. Louis July 15 and 16, 1891, the Board adopted the following resolution :

*WHEREAS*, It is the sense of this Board that the efficient, proper and just solution of the question of higher medical education is to be found in the creation of a State Board of Medical Examiners; therefore, be it

*Resolved*, That a committee of three be appointed to prepare a suitable bill to this end for presentation to the Legislature at its next session, and that the committee shall report at the next meeting of this Board; and furthermore, that the Governor be requested to include in his call for a special session the consideration of such a measure.

For good and sufficient reasons, your Excellency declined to comply with the request expressed in this resolution, and as there was no opportunity to present the matter to the Legislature in regular session, it has been delayed until this time.

A bill is now offered, which it is hoped will meet with your approval and that of the Legislature, and by becoming a law meet the ends for which it was intended.

The duty of pronouncing upon the standing of medical colleges in all parts of the world is one that, from the circumstances of the case, cannot be satisfactorily performed by any State Board of Health; and this duty has been largely imposed upon this Board during the past by the immigration into this State of physicians from all quarters of the globe.

As other States become more stringent in their requirements, their refuse material crowds into Missouri. An examining board that would accept no diplomas, but require the only evidence of knowledge *i. e.*, the passing of a thorough examination as to the acquirements and qualifications of the applicants—would protect the people of the State against ignorant practitioners, and relieve the Board of Health of a difficult, delicate and disagreeable duty, as well as stimulate all medical educational institutions to the establishment of a higher standard for graduation, and more thorough methods of instruction.

#### LOCAL BOARDS OF HEALTH.

In view of the dangers threatened us from an epidemic of Asiatic cholera during the coming year, there is urgent necessity for the organization of local Boards of Health throughout the State.

As a rule, people neither care for nor think of dangerous diseases until they are upon them, and they do not know, or if knowing, do not adopt the proper means of prevention. If there were local sanitary organizations in all the counties of the State, these would call the attention of the people to unsanitary conditions prevailing, advise them what course to adopt in emergencies, and if necessary would use their authority to secure these proper sanitary conditions. Such bodies would also be in correspondence with the State Board, and could aid and assist us in opposing successfully the advance and spread of dangerous infectious diseases. Missouri is sadly lacking in such organizations. The Board has sent communications to every county in the State, advising the organization of such local boards, and has sounded the note of warning throughout the State in no uncertain tone; yet so far we have had no responses, and we feel that such organizations will take place only on compulsion of law, or of an existing epidemic.

#### FINANCIAL SUPPORT OF THE STATE BOARD.

The Board respectfully asks that the General Assembly will appropriate not less than \$6000 per annum for the support of the Board of Health, including the costs of securing the reports of births and deaths, with a contingent fund of not less than \$25,000 for use in the

event of severe epidemics. The cost of quarantine, vaccination and the support of families quarantined, as well as compensation for clothing and bedding destroyed, would be a great expense, far beyond their financial ability, and in times of epidemics of great prevalence and long continuance, the demand upon the means at the command of villages and rural districts is much greater than they can bear.

We have always found trouble and delay in getting these communities to pay the expenses of such quarantine.

This fund might not be drawn upon at all, but in the event of its being needed the want would be urgent.

It is furthermore advised that the fee for registration be increased to \$3.00 or \$5.00, which would thus afford ample resources for all the expenses of registration, correspondence, printing, etc., and ought not to be objected to by physicians registering, since the larger fee of \$5 is collected in many other states.

#### MONTHLY BULLETIN.

The Board should publish a monthly Bulletin, by which it could keep in touch with all parts of the State, to give warnings, advice and other important information, such as is done in many other states of the Union.

In 1892 an attempt to establish such means of communication was made by this Board, but after two issues it was found impossible with the means at our command to continue the publication. Much of the work that appears to be incumbent upon a chief sanitary body of a state has not been attempted because of our inability to accomplish it, through inadequate means, and the knowledge that what is not done well had better not be done at all.

The Board has registered 504 physicians during the year, 23 midwives, and issued four duplicate certificates. From four physicians have been withheld certificates of registration on account of the standing of the colleges from which their diplomas were issued.

The Board has held four regular meetings and one call meeting: One in Jefferson City, one in Pertle Springs, Mo., and three in the city of St. Louis. The executive committee has held one joint session with the Executive Committee of the State of Kansas in Kansas City, Mo., and the Secretary has represented the Board at one national convention of Food and Dairy Commissioners in Washington, D. C., and has also attended a joint conference of representatives of Boards of Health in Chicago, Ill.

LEGISLATION RECOMMENDED AND AMENDMENTS TO EXISTING LAWS  
SUGGESTED.

1. An act making compulsory the early organization of local Boards of Health throughout the State and making provisions for the payment of their executive officers.

2. An act establishing a State Board of Medical Examiners whose whose duty it shall be to examine all entering upon the practice of medicine, surgery or midwifery in the State after the period of its enactment—said board to meet twice a year, and no member of said body to have any connection with or financial interest in any medical college whatever.

3. An act requiring under penalty that all imitation food, products or articles in common domestic use shall be plainly branded so as to show their true character.

4. An act authorizing the employment of a competent chemist, and making proper provision for his support, whose duty it shall be to test the purity and wholesomeness of all articles exposed for sale in the market as food products of all kinds, public water supplies, natural and artificial mineral waters, drugs, proprietary and patent medicines, etc., and to make reports of them to the Board as required.

5. An act appropriating \$12,000 for the current expenses of the Board, including cost of collecting and recording vital and mortuary statistics, rent, fuel, clerk hire, salary of Secretary, etc., and \$25,000 as a contingent or emergency fund to be used in defending the people of the State against dangerous, infectious or epidemic diseases.

6. Amend section 5428 so that county clerks shall receive compensation for making the record required and furnishing transcripts of same to the State Board of Health.

7. Amend section 5433 so that the Board shall report twice a year to the General Assembly, with the duty to make reports to the Governor on special subjects as required.

In conclusion, all the members of the Board desire to express to you their thanks for the courtesy you have shown them in their relations with you, and for the encouragement and assistance which you have always been ready to give them in the discharge of their official duties. All of which is respectfully submitted by the Missouri State Board of Health.

J. D. GRIFFITH, President.

R. C. ATKINSON, Secretary.

St. Louis, December 31, 1892.

# ABSTRACT OF PROCEEDINGS OF THE BOARD.

---

## ANNUAL MEETING.

JEFFERSON CITY, MO., Jan. 12, 1892.

Board met in annual session in the office of the Governor in the State capitol at 10 a. m.

Present—Dr. J. D. Griffith, Dr. G. A. Goben, Hon. J. P. Harman and R. C. Atkinson.

Absent—Dr. Wm. G. Hall, Dr. Albert Merrell, Dr. Geo. Homan.

The meeting was called to order by the President, Dr. Griffith.

Minutes of the preceding meeting read and approved.

The report of the Secretary was read and adopted.

The report of the Board to the Governor for the year 1891 was presented, read, adopted and ordered printed.

The Secretary was directed to confer with the Attorney-General, State Auditor and Secretary of State, and endeavor to have the report of the Board printed at once.

The report of the Treasurer was presented as herein exhibited. Same was adopted.

The report of Dr. Homan, former Secretary, giving an account of expenditures during his six months' service in 1891, from January 1 to July 15, was presented and ordered filed. Dr. Homan having asked that the vouchers be returned to him, the Treasurer objected, stating that in the event of an examination being ordered by the Legislature those vouchers might be called for. The request was denied, and it was ordered that these vouchers be retained by the Secretary and kept on file as part of the record of the Board. The Board found the report correct.

A certificate was ordered issued to Dr. Francis Morehead and Dr. Gustav Wolf, both of Jasper county.

The case of Dr. Wilcox, of Kirksville, said to have received a diploma from the college of physicians and surgeons at Keokuk, Iowa, while still a minor, was considered, and the matter was dismissed and the Secretary was instructed to keep a watchful eye on the college granting the diploma.

Dr. Griffith presented the case of Dr. Ravenscroft against the Jackson county court for non-payment of services rendered small-pox cases in Blue township, Jackson county, during the small-pox epidemic in 1891, and offered a motion that the whole matter in the case be presented to the Attorney-General through the Governor, that an opinion might be obtained on the subject.

The next action of the Board, being the election of officers for the ensuing term of one year, resulted in the election of Dr. J. D. Griffith President, Dr. G. A. Gobin, Vice-President, Hon. J. P. Harman, Treasurer, and Dr. R. C. Atkinson Secretary.

The Board then adjourned to meet at the Madison house at 7:30 o'clock P. M.

The Board met in adjourned session at 7:30 P. M. at the Madison house.

Dr. Atkinson, the Secretary, was appointed to represent the Board at the next annual meeting of the American Public Health Association, to be held in the city of Mexico, November, 1892. The motion was adopted.

At the suggestion of the President, the salary of the Secretary was fixed at \$1500 per annum for the year 1891.

On motion, the Board then adjourned, subject to the call of the President.

## REPORT OF THE SECRETARY.

---

*To the Hon. Board of Health of the State of Missouri :*

I herewith present the report of the Secretary to date of December 31, 1891.

Since the last quarterly meeting of the Board in October, 49 certificates of registration have been issued from the office. Of these, six were issued to midwives. I have written letters to each and every county of the State, asking information as to the state of health prevailing.

There are at present, and have been since the convalescence of the small-pox patients in Jackson county, no epidemics prevailing anywhere in the State, so far as I have been able to learn, with the exception of the infectious influenza, now well known as La Grippe, which has prevailed extensively all over the State, and the mortality resulting from it among the aged and infirm has been great.

### DIPHTHERIA AND SCARLET FEVER

Have been more or less present in the large cities as well as in the small towns and rural districts, but not in epidemic proportions. There has been considerable prevalence of typhoid fever, owing probably to the long continued dry season of this fall.

I have again applied for reports of the registration of births and deaths to all county clerks, and their replies are as formerly, that physicians do not make reports of either.

In obedience to your orders, communications have been sent to all members of Congress in Missouri, asking their aid in opposition to the scheme of draining the Chicago river into the Mississippi, and the responses I have received promise earnest opposition to the scheme should it ever be presented in Congress for action.

Applications have been made to the office for registration by physicians residing in other states, and having neither diploma nor certificates from State Board, but furnishing affidavits that they had practiced medicine in their own state more than five years prior to 1883. In every instance the certificates have been refused on the ground that the spirit of the law, if not the language thereof, applied only to those who had served that time of practice in the State of Missouri—the exception in the law regarding the time of practice being in the nature

f an indulgence which the state grants to her own children and not to strangers. If I am wrong in the position I have taken, I ask for instruction in the premises.

As the result of my observation, the Medical Practice act and the revocation by the Board of the licenses of physicians and midwives in certain instances do not seem to have caused a cessation of practice on the part of these people, or to have affected in any great measure irregular practitioners, as convictions under the law or very rare and difficult to obtain. The officers of the courts are apparently unwilling to handle such cases, and certain newspapers in the State, which derive revenue from the advertisements of these advertising physicians, make great efforts to educate the public sentiment of the State against the Board of Health on account of their action in regard to advertising physicians.

The amount received for registration fees during my term up to and including December 31, is \$132; amount expended and the necessary expenses incurred in registration, stationery, stamps, type-writing and special clerical work, as well as portorage and drayage, being \$67; the balance remaining on hand is \$65.

The amounts, items and dates of warrants drawn on the State treasury for the support of the Board during the whole of the year 1891 are as follows:

April 9.....	\$375 00	August 18.....	42 95
May 1.....	125 00	September 3.....	73 50
May 26.....	95 75	September 5.....	210 00
June 3.....	125 00	September 7.....	2 78
June 5.....	181 40	September 8.....	5 10
July 1.....	125 00	October 7.....	125 00
July 9.....	115 42	November 9.....	243 75
July 24.....	182 50	December 5.....	125 00
July 27.....	50 00	Total.....	\$2265 15
August 7.....	62 50		

Dr. T. L. Pierce, of Boydsville, Ark., who took the examination by the Board October 21, 1891, on the subjects required by law, failed to get the required per centum, receiving 80 per cent in one department only, physiology, and falling as low as 20 and 40 per cent in other subjects.

The number of cases of small-pox, as reported to me as occurring in the State of Missouri during the year 1891, is as follows: City of St. Louis, 74; Kansas City, 88; Blue township, Jackson county, 31; total, 193.

In the case of Dr. Morehead, of Jasper county, which was referred to the Executive committee for action at the last meeting of the Board, no action has been taken—the members of the committee preferring that the Board should act on the matter at this session. I have so notified Dr. Morehead.

Dr. Gustavus Wolf has forwarded me his diploma with an application for registration, having been informed at the last meeting of the Board that he could do so; but as I have received no definite evidence that he has quit the practice of medicine in the State of Missouri, I have waited before issuing the certificate for further light.

Respectfully,

R. C. ATKINSON, Secretary.

---

#### QUARTERLY MEETING OF THE BOARD.

May 16, 1892.

In response to a call of the Executive Committee, the Board met at Pertle Springs, Mo., on May 16, 1892, at 10 a. m.

Present—Drs. Griffith, Goben, Hall, Atkinson and Mr. J. P. Harmon.

Absent—Drs. A. A. Merrell and G. Homan.

Minutes of the previous meeting in January were read and approved.

The report of the Secretary was read and adopted.

The Secretary presented a communication from Dr. Y. H. Bond, asking that the Board so amend its rules regarding what is known as the "Three-Term Requirement" as to make it conform to the resolution on medical education, adopted by the American Medical College Association, which makes 1883 the last period for matriculating students for graduation in two years.

The communication was received, but the request was refused.

A communication from the general baggage agent of the Missouri Pacific railroad system, Mr. Nicholson, was presented, asking if the Board intended to add diphtheria to the list of diseases, deaths from which would preclude transportation on railway trains within the State.

The President, Dr. Griffith, stated that the Board had adopted and published regulations for the transportation of such bodies, which would render them innocuous if complied with, but at his suggestion the resolution was presented and adopted to the following effect as follows :

*Resolved*, That all roads passing through the State of Missouri be requested to provide for each one a separate zinc-lined apartment in baggage or express cars, with openings separate from the compartment containing baggage or express matter, for the transportation of bodies, dead of contagious or infectious diseases, so that there will be no contact or proximity of such bodies with the express or baggage; and that this resolution do not repeal or rescind any portion of the resolution heretofore adopted on this subject.

Dr. Hall here made a statement regarding a Dr. Walker who had entered the office of another physician on the plea of practicing under a preceptor, and acted as a substitute of the said physician during his absence, Dr. W. having no diploma or certificate; that he had told the gentleman that he must discontinue this conduct. Dr. Hall's action approved. Dr. Hall then asked for permission for Committee on State Examining Board to make their final report in July.

The Board examined Mr. Horwitz in chemistry, materia medica, therapeutics, medical jurisprudence, sanitary and hygiene, pathology, theory and practice of medicine, surgery, anatomy and obstetrics. Physiology was unintentionally left out.

The Board then adjourned to meet in July.

---

### SEMI-ANNUAL MEETING.

ST. LOUIS, MO., July 13, 1892.

State Board of Health met in semi-annual session at 10:30 a. m., at the Lindell hotel, St. Louis, July 13, 1892, and was called to order by the President.

All members present.

Before reading the minutes of the last meeting, the Secretary presented the application of Messrs. Horwitz, Wormley and Fullerton for examination by the Board for registration. Mr. Horwitz having failed on the previous examination, and on account of physiology having been left out of that examination, no charge was made for his examination.

Copies of questions for examination were then presented to the members of the Board, and meeting their approval, were given to two of the applicants, but the examination of Dr. Fullerton, a graduate of

the American Medical Eclectic College in Cincinnati, was delayed during the discussion which ensued as to the standing of the school of medicine from which he graduated.

It was determined that, as the school was not in good standing before the Board, he would have to take the examination before he could get a certificate. He was offered a special examination on materia medica and therapeutics, but declined it, preferring to take the examination offered the other two applicants; which was accorded to him.

In this discussion of the admission of Dr. Fullerton for the examination, Dr. Homan having raised a legal question, Dr. Merrell discussed the legal points and precedents in the case, and the Secretary produced copies of the Medicine Practice act of Missouri and the report of the Illinois State Board of Health on medical education and standing of medical colleges throughout the United States and Canada. The discussion was closed by Dr. Merrell, who moved that Dr. Fullerton be offered an examination on his statement, which was seconded and adopted.

Minutes were read and approved and the report of the Secretary made and adopted.

The Secretary then reported that, public charges having been published in the public press against the efficiency of the mode of instruction of graduation students pursued in the Newland School of Midwifery in St. Louis, he had written who signed these charges, as a former teacher of the school, asking for further information on the subject. Another teacher having agreed to testify, both had been requested to be present at this meeting; but as service had not been served on Dr. Newland, the owner of the institution, he being absent from the city, the trial of the case could not be proceeded with at the present time.

It was moved and seconded that Tandy make affidavit and charges, the same to be held by the Secretary until the next session of the Board, and that Dr. Newland shall be notified and have an opportunity of being present and defend. Dr. Tandy presented his affidavit and retired.

Dr. Charles Hughes, of the Barnes College of Medicine, sent in a communication through Dr. Goben, asking for a copy of the requirements for admission, instruction and examination adopted for a medical college in good standing. The Secretary was requested to furnish stated requirement.

Dr. Homan then presented a protest against the annual report of the Board for the year 1891, issued in January, 1892, complaining of certain clerical errors that were contained therein.

After an animated discussion, a committee was appointed to examine the minutes and see wherein the abstract in the report differs from the Secretary's record of same. The committee reported that they had found clerical errors.

Dr. Merrell then offered the following resolution :

**WHEREAS**, It appearing from the report of the committee appointed to compare the printed report and abstract of the proceedings for 1891 with the Secretary's record of same, that certain clerical errors appear therein—i. e., the former—in reference to this Board's action ; therefore, be it

**Resolved**, That corrections pointed out by the committee be made a part of the record of the minutes of this meeting and appear in the printed abstract of same when published.

It was adopted.

The committee appointed consisted of Dr. Merrell himself, other members objecting to serve on it.

The following report of errors found and corrections ordered was made :

On page 9 of the Annual Report of 1891 it is stated that the certificate of Dr. P. A. Medlin, of St. Louis, was revoked for unprofessional conduct. This should read : "The certificate of P. A. Medlin having been surrendered by him for cancellation, on request, his name was ordered stricken from the register."

On the same page the statement that the certificate of Bell English, of Marion, had been revoked for unprofessional conduct should read : "He was refused a certificate."

On page 15, the statement that the application of A. H. Madry of Barry county was refused is an error, as no final disposition had at that time been made of his case.

On same page the statement that the application of John R. Smith of Jasper county was withdrawn by permission should have read : "Permission was given John R. Smith to withdraw his application."

On page 19, change sessions to "session."

The vote by which Report of the Committee of one was adopted was as follows :

**Affirmative**—Merrell, Homan, Hall.

**Negative**—Goben, Harmon and Atkinson.

The deciding vote was cast for the President in the affirmative.

Dr. French, of the Barnes Medical College, then offered a statement of requirements for admission, examination and graduation of students of the Barnes Medical College, which was referred to the executive committee for comparison without requirements.

The President, Dr. Griffith, spoke from the chair regarding the dangers of Asiatic cholera spreading to and through this country, owing to a lack of proper quarantine and in consequence of the non-existence of a National Board of Health.

The matter was discussed, and the two following resolutions were offered by Dr. Homan, each being adopted in its order, and the secretary was instructed to send copies to the mayors or health authorities of the towns in Missouri, so as to disseminate, the resolution in general.

The traveling expenses of the members of the Board were then audited and approved, and the Board adjourned to meet in October, 1892.

---

### CALL MEETING OF BOARD.

ST. LOUIS, MO., Sept. 16, 1892.

In response to a notification of the Governor of the State, the Board met at 8:30 o'clock p.m. at the Laclede hotel, St. Louis.

Present—Drs. Goben, Merrell, Homan and Atkinson.

Absent—Drs. Griffith and Hall, and Mr. Harmon.

The Board was called to order by the Chair.

The Secretary then reported the action of the Executive Committee taken in joint session with the Executive Committee of the Kansas State Board of Health, at Kansas City, Sept. 10, 1892; also the result of a conference consisting of nine State Boards of Health representatives, held in Chicago Sept. 14, 1892—both of the above meetings having been held to consider means of preventing the advance of cholera into the west.

Dr. Merrell moved the approval of the Kansas City conference of the Executive Committees of the two Boards, which was seconded and adopted.

The Board then indorsed the action of the Chicago conference.

It was then moved by Dr. Merrell, and seconded by Dr. Atkinson, that an address be prepared and sent to all health authorities and municipal officers of the State of Missouri, informing these communities that they have authority to establish boards of health in their respective localities, and advising them to do so at once; that house-to-house visitation and inspection be recommended, and that an address containing advice as to how to proceed in sanitary direction be formulated and promulgated.

The motion was adopted.

Dr. Homan suggested that this committee, in publishing this address, get it in such form as may be continued indefinitely as a periodical, and that the question of its continued publication be a mat-

ter for the consideration and decision of the Board at its next meeting. The adoption was suggested.

Dr. Merrell moved that the Board invite all health municipal county authorities to attend a conference with the Board on the subject of infectious diseases at the October meeting in St. Louis in 1892.

Seconded and adopted.

The Board then adjourned to meet in St. Louis, October 5, 1892.

NOTE.—The report and resolution of the Chicago conference was considered section by section, and adopted.

### LAST MEETING OF BOARD OF 1892.

The Board met in the Council chamber of City hall in St. Louis October 5, 1892, with the expectation of meeting the sanitary and municipal officers of different localities throughout the State in joint conference, in accordance with the invitations extended through the Missouri Bulletin. There being none of those invited present, the Board proceeded to transact its ordinary business and other extraordinary business presented to it on that occasion.

All members of the Board were present excepting Hon. John P. Harmon.

The minutes of the last meeting were read and approved.

The case of the Newland College of Midwifery, against which the charges of inefficiency in educational methods and graduation made by Dr. Louis Tandy in his affidavit, presented to the Board at its July meeting, was then taken up. Affidavits on both sides were presented and read. Dr. Newland and Dr. Loftus appearing in person for the defense and Dr. Tandy in the prosecution, the Board examined thoroughly into the merits of the case, and on motion of Dr. Merrill dismissed the case "on account of the insufficiency of the evidence." A statement was made by the Secretary regarding the expense of publishing and mailing the Missouri Bulletin, and asking for instruction as to how to proceed in the matter in the future.

A resolution was offered by Dr. Goben providing that the publication of the Bulletin be continued so long as the means of the Board would justify, provided that it be admitted through the mails as second-class matter.

The resolution was adopted.

Dr. Merrell offered a resolution asking that the Legislature make provision for the payment of the unpaid salary of Dr. Homan, formerly Secretary of the Board; which resolution was adopted as the sense of the Board.

Dr. Homan then offered a resolution to the effect that a continued effort shall be made to secure a conference of the local sanitary and municipal authorities throughout the State with the Missouri State Board at its next meeting, in Jefferson City, and instructing the Secretary to ascertain the number of local boards of health throughout the State and report the same at the next meeting.

The accounts of the members being then audited, the Board then adjourned.

## LIST OF PHYSICIANS,
